

# Arizona Miner.

SAN FRANCISCO AGENCY.—Mr. Thomas Boyce is the only authorized agent for the MINER in San Francisco. Orders left at his office, New Merchant's Exchange Building, room No. 30, California street, will be promptly attended to.

**EXTRAVAGANCE IN MEN.**—There are lots of young men with whom the spending of money is a positive disease. They constantly demonstrate the truth of the familiar proverb. There is a sort of fatal profusion in their habits. Women are accused very unfairly of being very extravagant. As a rule men are far more so; and the account against them is principally due to those who fritter every thing they gain or sell in numberless and nameless trifles. A woman has a natural title to being well clad—to being, indeed, clad so as to make the most of her appearance. She has a sense for jewelry. T. deny her ornaments is to stifle a genuine and reasonable instinct. But a man who parts with a considerable portion of his income in order to comply with every freak of his tailor, and who really seems to have only used his brains upon the patterns of neck-ties, is one of the most pitiable creatures alive. A gentleman ought to be correctly and neatly dressed. There is something revolting, as well as startling, in the style the unfortunate London cad turns out to air himself on the tops of omnibusses and on the penny steamboats on Sunday. Still the extremes meet. The cad is not, in all probability, a greater jackass than the person he mimics. He is also extravagant in his own miserable way. He has given more than he can afford for his flaring scarf with its horrible brass pin, his embroidered shirt front, and all his vile paraphernalia. Extravagance is not confined to a class. Some working men spend proportionately as much in beer houses and music halls as those above them do in clubs and at the opera or theatre.—*London Review.*

**HOW TO CATCH RATS.**—J. H. of Decatur, Illinois, is responsible for the following: Cover a common barrel with stiff, stout paper, tying the edge around the barrel; place a board so that the rats may have easy access to the top, sprinkle cheese sparings or other "feed" for the rats on the paper for several days, until they begin to believe they have a right to their daily rations from this source. Then place in the bottom of the barrel a piece of rock about six or seven inches high, filling with water until enough of it projects above the water for one rat to lodge upon. Now replace the paper first cutting a cross in the middle, and the first rat that comes on the barrel top, goes through into the water and climbs on the rock. The paper comes back to place and the second rat follows the first. Then begins a fight for the possession of the dry place on the stone, the noise of which attracts the rest, who share the same fate.

**MODEL QUARTZ MILL.**—A Nevada State exchange thus describes one of the model quartz mills in the Reese River mines. The Keystone dry crushing mill of twenty stamps is the best arranged and most effective establishment of the kind we have in this region. The batteries are placed so that the reduced ore is received into chambers on a level with the roofs of the roasting furnaces and conveyed to them by a car passing along a line of rails. When the ore is roasted it is discharged on a cooling floor and thence taken by another car away to the amalgamating room, where the rims of the pans are about on a level with the line of the rails. The settlers are still lower down and with a descent of thirty feet from the battery floor to the amalgamating room, the ore in its progress down hill with the least possible amount of manual labor. With a double discharge through brass wire screens of fifty mesh, the batteries reduce from sixteen to eighteen tons of sulphuret ore every twenty-four hours. The mill is provided with eight reverberatory roasting furnaces, ten Varney pans, and four settlers. After having been idle for several months, mainly from want of salt, the stamps go into operation once more on Monday morning, with abundance of high grade ore at command.

**THE NEW COMMISSIONERS.**—Mr. Raymond, the new Commissioner for the collection of Mining Statistics on this coast, arrived on Sunday last. The next evening he addressed the California Academy of Sciences. The substance of his remarks will be found in our report of the proceedings of the Academy. The clearness with which he defined his position, and his agreeable style of speaking, made a most favorable impression. He is evidently a "live man." He is moreover by education especially fitted for the office. His acquaintance with the very subjects with which it has to do, made him sought after some two years ago to take the editorship of the *American Journal of Mining*; which position he accepted, and indeed still retains. His affable manner will doubtless disabuse many an honest miner of the notion that "Freibergers" are all conceited and arrogant positivists, who hold in contempt the ideas of "practical men." We predict that he will win golden opinions among us.—*S. F. Mining Press.*

**A GIGANTIC RAILROAD SCHEME.**—Turkey proposes to do a thing quite as stupendous as the Pacific Railroad, viz: build a railway from Belgrade through Constantinople to Bassora on the Persian Gulf. With certain branches it will be nearly 8,000 miles in length, and the estimated cost is \$60,000,000 sterling, \$300,000,000. The Turkish Government guarantees the interest on this sum, 7 per cent, on a part, and 5 per cent, on another part, amounting to about \$3,500,000 sterling a year, which is nearly a third of the whole revenue of the empire. The engineers are now at Belgrade arranging with the Serbian Government as to the route through Servia. *Commercial Herald.*

**GEN. SHERMAN,** at Cheyenne, stated in substance, the other day, that he had lost faith in Indian pledges of peace. He proposed to arm friendly Indians, and frontier men, and hunt down the faithless tribes.

**STATISTICS.**—The following clever hits are from the *Mobile Nationalist*:

Statistics are all the fashion and the following furnished by a figurist, are very much so. They may be commended "to keep in the cold."

Out of 500 persons only five survive long enough to mind their own business.

Out of every ten men in the street not more than one has brains enough to keep from standing gossiping directly in the middle of the sidewalk crossing.

Out of every twelve women one dozen make themselves up to attract as much attention as possible, and then pretend to be angry if they get it.

Out of 100 persons above five score don't behave as well as they require other people to do.

Out of 15 in a street passenger railway car about one will in riding a mile conduct himself all the way just as he ought to do.

Out of a large number of young people who have never seen anything of life or the world, an equal number constantly refer to their experiences.

Out of 80 young women whose experience of life is confined to gossiping and flirting with simpatons like themselves at parties, all except none, are generally of the opinion that they have seen an immense amount of humanity.

Out of several dozen people only a limited number will not talk gossip of their friends, and then kindle up if they hear it has been talked of themselves.

There is only one drunkard to every 74 persons, but the liquor which the other 73 "chew up" daily would keep half a dozen of them drunk as peeps until the next morning.

Out of 100 persons six reach the age of 60 years, and of these five generally behave so as to make their friends wish they hadn't.

**THE SECRET OF LONG LIFE.**—One of the most sensible sayings on the art of longevity, so far as it can be attained, was that given by an Italian in his 116th year. Being asked the secret of his living so long, he replied with that improvisation for which his countrymen are so generally noted:

"When hungry, of the best I eat,  
And dry and warm I keep my feet;  
I screen my head from sun and rain,  
And let few cares perplex my brain."

A writer observes that the last line contains the quintessence of the best advice that can be given on the subject. The deadliest foe to longevity is excitement. Every man is born with a certain stock of vitality, which cannot be increased, but which may be husbanded or expended rapidly, as he deems best.

Within certain limits he has his choice to live fast or slow, to live extensively or intensively, to draw his little amount of life over a large space, or to condense it into a narrow one; but when his stock at length becomes exhausted he has no more.

He who lives extensively, who avoids all stimulants, takes light exercise, never overtaxes himself, indulges no exhausting passion, feeds his heart and mind on no exciting material, has no debilitating pleasures, lets nothing ruffle his temper, keeps his "accounts with God and man daily squared up," is sure, barring accidents, to spin out his life to the longest limit which it is possible to attain; while he who lives intensively, who lives on highly seasoned food, whether material or mental, fatigues his brain or body by hard labor, exposes himself to inflammatory disease, seeks continual excitement, gives loose reins to his passions, frets at every trouble and enjoys little repose, is burning the candle at both ends, and is sure to shorten his days.

**SETTING TYPE BY ELECTRICITY.**—W. C. Dodge writing to the *American Artisan*, says:

Among the many wonderful evidences of the ingenuity of mankind is the machine for setting and distributing type. This is so perfect that I have before me a book containing 24,993 ems of solid matter—or 34,225 ems of leaded matter—the whole of which was "set" and "distributed" in six hours and thirty-nine minutes by this machine. This is truly wonderful; but I want to say that the wonder need not stop here. By means of one of these machines located in the large newspaper offices in the principal cities and connected by telegraph with the capitol, the reporter or operator can set the type himself, the machine standing in New York or New Orleans, and he being in the capitol! Or, instead of setting the type he may produce a matrix—by operating a series of arms or levers having type attached, and made to strike upon a suitably prepared and movable plastic surface—from which a stereotype plate may be cast ready for the press, in a few minutes from the time the speech is delivered, or the action had, whatever it may be. Speeches would still have to be reported by short-hand, simply because no man could either write them out or set them up as fast as delivered. The compositor, having the short-hand notes before him, could then set the type from them upon the machine at a distance, or if required the short-hand notes could be translated, as is now done for the telegraph operator, and then set up by telegraph. In the latter case the same labor of the operator that now sends the message would put it into type ready for the press, thus dispensing with the time and labor now required to write out the message and set up the type. This seems to be the next great step in the electrical progress of the age; and there is nothing to prevent its being done at once. It is simply a question of time and money—that's all.

**TO BREAK CATTLE TO LEAD,** take two animals of about equal size and strength and tie them together with a strong rope by placing one end around the horns of one animal and the other end around the horns of the other and make them fast as for leading or tying up, leaving three or four feet of rope between the inner horns, and turn them into a field free from trees. Let them run, pull and haul, till they are tired of it, and they will walk side by side and feed together. Then take off the rope and they will ever after lead with the docility of a child, even though the first occasion may be years afterwards. It is much easier than for a man to be jerked around all day by a wild heifer or steer, and more effectual.

**A MEETING AT SOUTH PASS CITY** on the 19th, resolved to petition for a Governor of the Territory of Lincoln.

## Wickenburg.

### ARIZONA HOTEL,

WICKENBURG,

Yavapai County, Arizona.

**THE UNDERSIGNED, HAVING** recently taken charge of the above named house, would inform the people of Arizona and the travelling public, that it is his intention to do everything possible to please and satisfy all who favor him with their patronage.

P. O'NEILL, Proprietor.  
Wickenburg, March 12, 1888. m14

**All Kinds of Lumber,**

for Building purposes, and for Mills and Mining.

Come with your money, and we will arrange the price according to the quality.  
Terms, cash on delivery, payable in U. S. gold coin, or its equivalent in currency.  
A. O. NOYES, Agent.  
Prescott, September 17, 1887.

### PRIVATE MEDICAL AID.

**Quick Cures and Moderate Charges.**

### DR. DOHERTY'S

Private Medical and Surgical Institute.

Sacramento Street, below Montgomery (opposite Pacific Mail Steamship Company's office). Private entrance on Leidesdorff street, San Francisco.

Established expressly to afford the afflicted sound and scientific medical aid in the treatment and cure of all Private and Chronic Diseases, cases of Scrofula and all Sexual Disorders.

**To Correspondents.**

Patients (male or female) residing in any part of the States and Territories, however distant, who may desire the opinion and advice of DR. DOHERTY in their respective cases, and who think proper to submit a written statement of such in preference to holding a personal interview, are respectfully assured that their communications will be held most sacred. DR. DOHERTY takes this opportunity of observing that all letters are opened and replied to only by himself, and the latter as promptly as possible.

If the case be full and candidly described, personal communication will be unnecessary, as instructions for diet, regimen and the general treatment of the case itself (including the remedies) will be forwarded without delay, and in such manner as to convey no idea of the purpose of the letter or parcel so transmitted.

Consultation, by letter, or otherwise, free.

Permanent cure guaranteed or no pay.

Address, W. K. DOHERTY, M. D.,  
San Francisco, Cal.

### Spermatorrhoea.

DR. DOHERTY has just published an important pamphlet, embodying his own views and experiences in relation to Impotence or Virility, being a Short Treatise on Spermatorrhoea or Seminal Weakness, Nervous or Physical Debility consequent upon this Affection, and other Diseases of the Sexual Organs.

This little work contains information of the utmost value to all, whether married or single, and will be sent FREE by mail on receipt of Six Cents in postage stamps for return postage.

Address, W. K. DOHERTY, M. D.,  
San Francisco, Cal.

## Miscellaneous.

### GEO. F. HOOPER & CO.

Address, "PUBLISHERS ARIZONA MINER,"

PRESOTT, A. T."

### SUMMONS.

**IN THE DISTRICT COURT, THIRD** Judicial District, in and for the County of Yavapai and Territory of Arizona.

Joseph Beebe, Plaintiff, vs. N. K. Lamson, Defendant.—Order of Publication.

Action brought in the District Court in and for the County of Yavapai and Territory of Arizona.

The Territory of Arizona sends greeting to N. K. Lamson, defendant.

You are hereby summoned and required to appear in an action brought against you by the above named Plaintiff, in the District Court of the Third Judicial District in and for the County of Yavapai and Territory of Arizona, to answer the complaint filed therein, (a copy of which accompanies this summons,) within twenty days (exclusive of the day of service) after the service upon you of this summons, if served in this county; but if served out of the county and in the Territory, then within forty days; and if served out of the Territory, then within twenty days, or judgment by default will be taken against you, according to the prayer of said complaint.

This action is brought to recover the sum of one thousand four hundred ninety-three and 75/100 dollars, (\$1,493 75/100) on a certain promissory note, drawn and executed by you, and in favor of the above plaintiff, bearing date of "San Francisco, March 8th, 1887," with interest at the rate of one and one half per cent. per month.

And, also, for the foreclosure of a certain deed of mortgage, drawn and executed by you to the above named plaintiff, to secure the payment of said note, and bearing some date of said note, and duly recorded in the office of the County Recorder for said county of Yavapai and Territory of Arizona, all of which is more minutely shown in plaintiff's complaint, to which direct reference is hereby made.

And you are hereby notified that if you fail to appear and answer the complaint as above required, the Plaintiff will take default against you, and apply to the Court for the relief demanded in his complaint and for costs and disbursements in this behalf expended.

[L. S.] Given under my hand and the seal of the District Court, this 13th day of May, A. D. 1888.

ED. W. WELLS, Clerk.

JOHN HOWARD, Plaintiff's Attorney.

### SIXTH INDUSTRIAL EXHIBITION.

... OF ...

### Mechanics Institute.

San Francisco.

**THE BOARD OF DIRECTORS OF THE** Mechanics Institute hereby give notice that the Sixth Industrial Exhibition of that Association will be held some time in August next, in a building to be erected for the purpose in Union Square in this city. Every preparation will be made to accommodate exhibitors and visitors with a view to make the Exhibition profitable, instructive and pleasant to all parties.

During the three years which have intervened since the holding of the last Exhibition in this city the manufacturing, mechanical, scientific and useful and ornamental arts have made unprecedented progress on this coast, and it is believed will exceed any other in value that has ever been held on the shores of the Pacific.

The plan of building to be erected, which has been adopted by the Board of Directors, it is believed, will prove to be the best adapted, both for display and convenience of the public, of any building ever erected in the State. The building will be perfectly water-tight, being covered with a shingle roof, so that no damage from the elements can be anticipated.

All parties who are interested in any of the branches of Manufactures, Mechanics, or the Arts and Sciences are invited to exhibit in the proposed Exhibition, and to share in the publicity and consequent profit which always attends such enterprises. Suitable premiums will be offered, and the specific date of opening the Exhibition will be published at some future time.

By order of the Board of Directors,  
JAMES H. DUNN, Sec. Recy.
